KASH LEGACY

ACCESSIBILITY STATEMENT

Kash Legacy Digital Radio • HBCU Edition
Effective Date: September 26, 2026

Kash Legacy Digital Radio is committed to making its digital radio experience, website content, and online services welcoming and usable for as many people as possible, including people with disabilities. Accessibility is an ongoing responsibility, and we aim to improve our digital services as technology and accessibility practices develop.

Our Accessibility Goal

Kash Legacy aims to follow the Web Content Accessibility Guidelines (WCAG) 2.1, Level AA as a practical accessibility benchmark for content and features under our control. WCAG provides widely used guidance for making digital content perceivable, operable, understandable, and robust.

For private businesses, the U.S. Department of Justice explains that the Americans with Disabilities Act (ADA) can require businesses open to the public to provide equal access to goods, services, privileges, and activities offered on the web. The Department also explains that private businesses have flexibility in how they meet the ADA's general nondiscrimination and effective-communication requirements; its guidance identifies WCAG as a helpful technical standard. Georgia separately requires WCAG 2.1 AA for state-managed digital properties. Kash Legacy voluntarily uses that standard as a goal; this statement does not claim that the Georgia state-government web standard itself governs this private station.

Accessibility Measures We Aim to Use

- Clear headings, logical page structure, and readable text.
- Keyboard-accessible navigation and controls where reasonably possible.
- Sufficient color contrast and information that does not rely on color alone.
- Text alternatives for meaningful images and graphics when appropriate.
- Labels and instructions for forms and interactive controls.
- Captions, transcripts, descriptions, or other alternatives for important prerecorded audio or video when reasonably available and appropriate.
- Controls that allow users to pause, stop, or manage moving or automatically playing content where supported.
- Compatibility testing with common browsers, mobile devices, zoom features, and assistive technologies as resources permit.
- Periodic review of new pages, documents, and features for accessibility barriers.

Digital Radio and Audio Content

Because Kash Legacy is an audio-first service, some programming is naturally delivered through sound. When important information is provided only in audio, we aim to provide an accessible alternative when reasonably possible, especially for essential instructions, public information, forms, policies, and station business. Music lyrics and third-party copyrighted programming may not always be available in text form.

Third-Party Content and Services

Some features may be supplied by third parties, such as streaming players, social-media embeds, video platforms, payment processors, advertising tools, or linked websites. Kash Legacy does not control every

accessibility feature of third-party services, but we welcome reports of barriers and will look for reasonable alternatives when possible.

Documents and Downloadable Content

We aim to make important downloadable documents readable with assistive technology and to provide an alternate format upon reasonable request when we can. Older, archived, promotional, or third-party documents may not fully meet current accessibility practices.

Need Assistance or Want to Report a Barrier?

If you have difficulty accessing any part of Kash Legacy's digital services, please tell us what page, feature, player, document, or content caused the problem and, if you are comfortable doing so, what assistive technology or device you were using. We will make reasonable efforts to provide the information or service through an accessible method and to address barriers under our control.

Ongoing Improvement

Accessibility is not a one-time project. Kash Legacy intends to review feedback, correct barriers within its control, and consider accessibility when adding or updating website features, mobile experiences, forms, media, and documents. This statement may be updated as our technology and accessibility practices change.

Statement Date

This Accessibility Statement is effective September 26, 2026.
